I'm swapping an LSx in to my 1993-1997 GM F-Body car that was an LT1. Will your LSx tubular k-member for the 1998-2002 GM F-Body work and fit?

Yes, our LSx tubular k-member will work in any 1993-2002 GM F-Body car. The k-member itself is the same for all 1993-2002 Camaro and Firebird cars, the only difference is the motor mounts on the k-member.
