

I already have motor mounts, do I need the motor mount pads installed on the k-member?

K-members are available with no motor mount pads for those who will be using a motor plate, or with motor mounting pads that will accept your block mounted motor mounts.

If you will be using any block mounted motor mounts then you must get the motor mount pads installed on the k-member. The motor mount pads are what the block mounted motor mounts bolt fast to on the k-member.
