

Spohn Performance | Support Center

I'm ordering a rear end, how long does it take to ship out? How does it ship?

If you are ordering a Moser Engineering rear end it will ship two (2) business days after your order is placed and/or your payment clears (4 business days if being powder coated). Strange Engineering rear ends generally take 3-4 weeks to ship.

Ford 9" rear ends ship via regular UPS Ground.

All other rear ends must ship via Truck Freight.

You will be emailed the UPS or Truck Freight shipment tracking number upon shipment so you can track your rear end in for delivery. Be advised that for residential truck freight shipments the trucking company will call you a day or so ahead of time to arrange a delivery date and time.
