

## **Spohn Performance | Support Center**

### **I'm ordering a rear end, will the bolt pattern match my vehicle type?**

Yes, we get asked this question a lot. Some people think because they are getting a Ford 9" rear end as an example that it will have a Ford bolt pattern for the wheels. No matter what rear end you get, the bolt pattern will match the factory specifications for the year and type of vehicle you are ordering it for.
